DETAILED ACTION

Acknowledgment is made of the receipt of the amendment filed on 4/8/03. Claims 1-33 are currently pending.

Claim Objections

1. Claims 1, 14, and 27 are objected to because of the following informalities:

in claim 1, line 3, delete "capable of",

in claim 14, line 3, delete "capable of", and

in claim 27, line 7, substitute "this" with --the--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(c) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(c) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the

Art Unit: 2876

reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Canini et al. (US 6,512,218) (hereinafter referred to as 'Canini').

Canini teaches a data acquisition device with variable shape pixel which operates according to figure 15. A maximum pixel height is initially set; the image is then acquired; the acquired image is processed to extract coded data; it is verified whether reading has been successful; if not, the pixel height is reduced and the image is acquired again (col. 9, lines 12-28). Figures 12a-14c illustrate the pixel array.

Response to Arguments

3. Applicant's arguments with respect to claims 1-33 have been considered but are moot in view of the new ground(s) of rejection.

The Canini reference has been applied to reject independent claims 1, 14, 27, and 31 and dependent claims 2-13, 15-26, 28-30, 32, and 33 which were previously indicated as allowable.
